				COMMENTS
	Is a ramp necessary to enter the building? IF NO, skip to 16.	Yes	No	
	Is there a ramp present to enter the building? IF NO, score NO for items 12-15	Yes	No	
12	At least one sturdy railing is present on one side of the ramp.	Yes	No	
13	The slope of the ramp is no more than 1:12 (one inch of rise for every 12 inches of length).	Yes	No	
14	The ramp is at least 3 feet wide	Yes	No	Width
15	The ramp has a flat resting area every 30 feet. *Score N/A if the ramp is less than 30 feet long	Yes	No	
	Is there an ENTRANCE/ DOORWAY present? IF NO (e.g., a park), skip to SECTION II	Yes	No	
16	Threshold/doorsill is flat or no more than ¼ inch high.	Yes	No	Height
	Does the entrance to the facility have an automatic door opener? IF YES → Score YES for items 17 AND 18 and go to item 19 IF NO → Answer items 17-19. SKIP item 20 and continue to SECTION II.	Yes	No	
17	There is a clear space at least 18 inches wide next to the handle side of the door. The space is clear of obstacles or debris (e.g., trash cans, ashtrays, etc.)	Yes	No	
18	The entrance door can be opened using the strength of only 2 fingers (5 lbs of force or less)	Yes	No	Lbs.
19	The doorway measures at least 32 inches wide.	Yes	No	
	Does the automatic door open by itself (motion detection)? IF YES skip 20 and continue to SECTION II	Yes	No	
20	The control button for the automatic door is on the latch side of the door (side with handle) OR is otherwise positioned so that the door may open without interference.	Yes	No	
SECTION II: USING THE BUILDING				
	Are there any interior doors (excluding restrooms)? IF NO, skip to 24. If there are doorways without doors, or if interior doors are propped open, score YES for items 21 and 22 and go to item 23	Yes	No
